

Name : **MR.RAMAIAH R**

Age / Gender : 65 Years / Male

Ref.By : DR SUMANTHA

Req.No

BIL1088570

TID/SID : UMR0428585/ 21471741

Registered on : 31-May-2021 / 10:52 AM

Collected on : 31-May-2021 / 10:59 AM

Reported on : 01-Jun-2021 / 13:38 PM

DEPARTMENT OF CLINICAL BIOCHEMISTRY

**C-Reactive Protein (CRP), Serum**

Investigation	Observed value	Biological Reference Interval
C Reactive Protein Method: Immunoturbidometry	<b>142.1</b>	<5.0 mg/L <b>Note:</b> Biological Reference Ranges are changed due to change in method of testing.

Note:

Kindly correlate clinically

**Interpretation:**

C-Reactive Protein (CRP) test is used to aid in the diagnosis of infections or diseases which cause inflammation. CRP is a protein produced by the liver. Higher than normal concentrations of CRP are often an indicator of infection or inflammation in the body. This test can help determine if an infection is present but not the source of the infection. CRP concentrations increases in bacterial infections, malignancies, inflammation, and tissue destruction. CRP is used as an index of the treatment in rheumatic fever and certain other conditions.
